MEMORANDUM FOR: APEX Steering Group Members

Executive Registry

81-6451

At COMIREX's request, a 23rd item for the list of "Good Things" is attached. Again, I request all ASG members to review carefully the Final Report and the two security policy manuals in order to be certain that each participating agency or department lists for discussion those parts of the APEX package deemed by the organization to be worthy of salvage. If such items are not tabled for discussion in the near future, there is little probability of their survival as issues and even less likelihood of implementation.
